

Test Summary Report

Project: Registration Form Automation

Module: User Registration

Version: 1.0

Date: 2025-10-06

Testing Environment:

- Operating System: macOS
- Browser: Google Chrome
- Version: 118.0
- Device: MacBook

Test Execution Summary:

- Total Test Cases: 4
- Passed: 4
- Failed: 0

Test Coverage:

- All functional requirements (SSN, Email validation) were covered by test cases.
- Non-functional requirements (UI responsiveness, error messages) were checked manually.

Testing Findings:

- The application validates SSN and Email input correctly.
- All test cases passed successfully.
- The form interface is clear and user-friendly.

Recommendations:

- Continue monitoring for potential bugs during real usage.
- Expand automated test coverage for other fields and features (e.g., gender, job, CV upload).

Conclusion:

The Registration Form application is stable, functional, and meets the tested requirements. All automated tests passed as expected.

Test Cases:

Test Case ID	Test Steps	Expected Result	Actual Result	Status
TC01 – Valid SSN	Enter '123-45-6789' in SSN field	SSN field accepts value	As expected	Pass

		in correct format		
TC02 – Invalid SSN	Enter '123456789' in SSN field	SSN field pattern validation should trigger	As expected	Pass
TC03 – Valid Email	Enter 'test@example.com' in Email field	Email field accepts value in correct format	As expected	Pass
TC04 – Invalid Email	Enter 'test@com' in Email field	Email field should show validation error	As expected	Pass
